Talent & Learning Analytics Dashboard

16.1% of employees left - where, why, and what HR can do

1,470	237	16.1%
employees	leavers	attrition rate

Power BI | Power Query | DAX | Excel - IBM HR sample data (fictional), one point-in-time snapshot

From a raw CSV to a self-testing Power BI model

1

Raw data

1,470 employees x 35 columns

2

Excel

Profiling + lookup tables

3

Power Query

25 queries: clean, map, band

4

Model + DAX

Star schema, 33 measures

5

Report

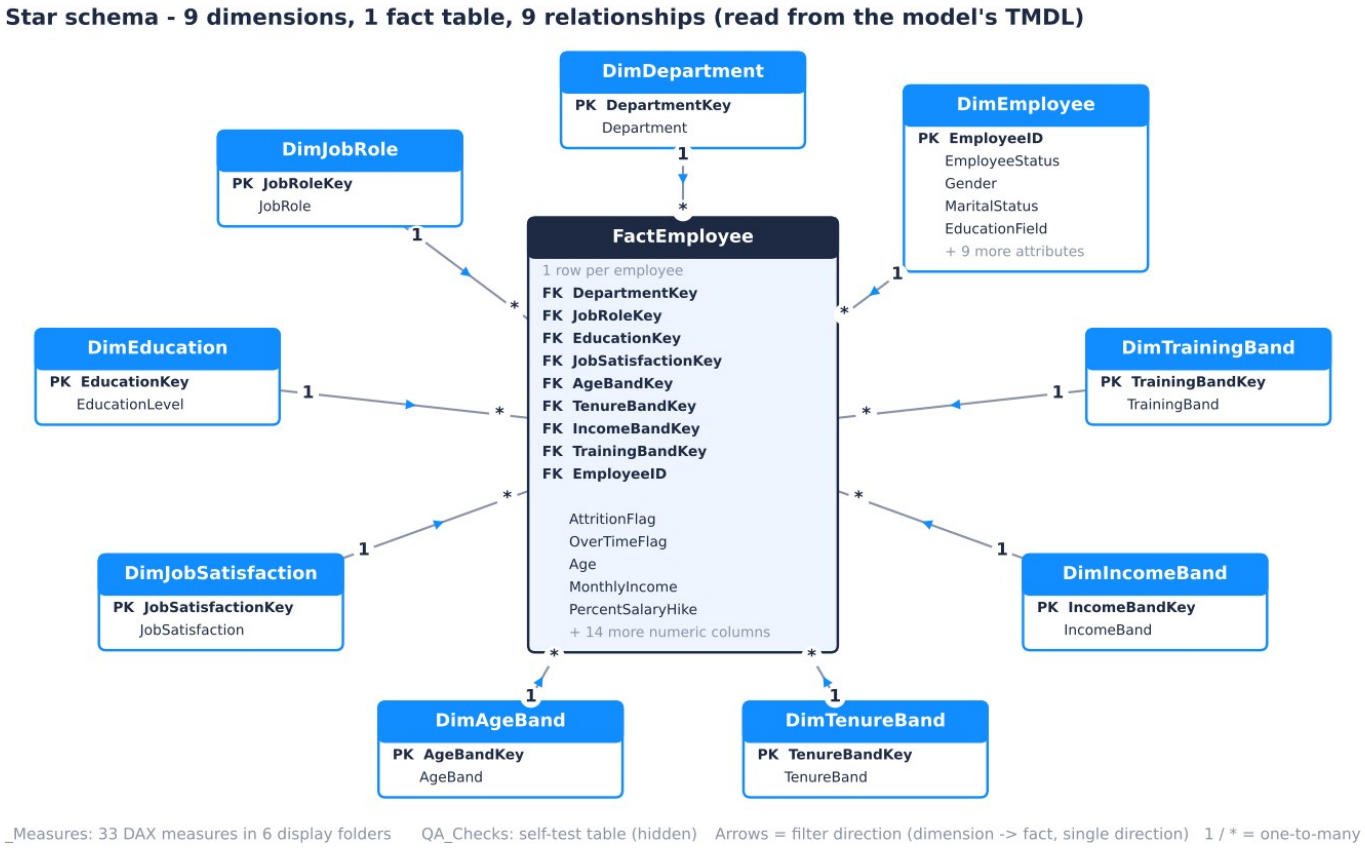

8 pages, drill-through

498

automated checks passed, Steps 1-7

Every displayed number was compared with an independent calculation from the raw CSV

A star schema built for slicing

1 **Single-direction filters**

9 one-to-many relationships, dimension to fact - no ambiguous paths

2 **Measures, not columns**

33 DAX measures with DIVIDE, KEEPFILTERS and a REMOVEFILTERS company baseline

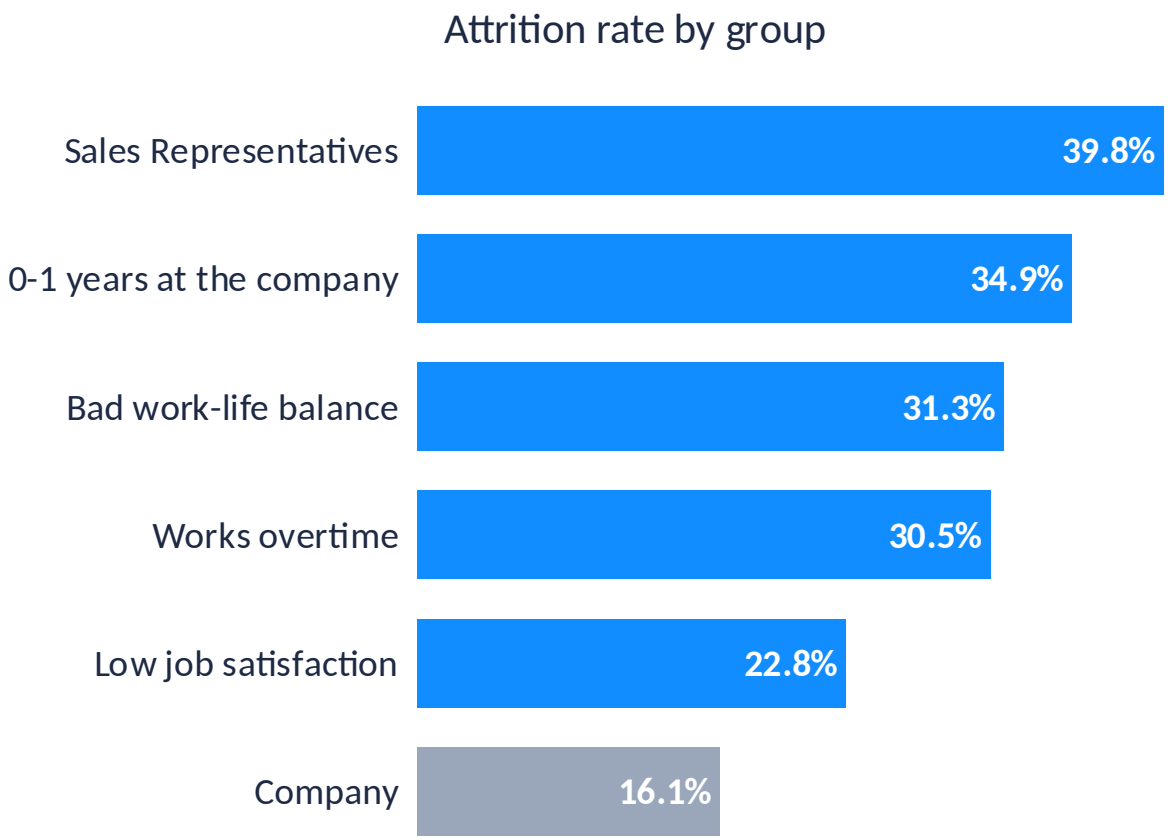

3 **Self-testing**

35 QA checks recalculated on every refresh

4 **Code, not clicks**

PBIP / TMDL text format: reviewable in Git and rebuildable from scripts

Overtime and the first year stand out

2.9x

higher attrition with overtime (30.5% vs 10.4%); odds ratio 5.0 after controls

55.1%

attrition in the first 0-1 years when combined with overtime

+23.6 pts

Sales Representatives vs the company rate

Performance rating does not predict attrition (16.4% Outstanding vs 16.1% others). Associations in a snapshot, not proven causes.

Four actions to pilot, one data fix

1 Reduce sustained overtime

Monthly overtime reviews and workload rebalancing, starting with the highest-risk roles

Track: Overtime %, Attrition Rate - Overtime

2 Make the first year stick

90-day onboarding, a mentor for every new hire, front-loaded learning

Track: Early Tenure Attrition Rate (0-1 yrs)

3 Retain Sales Representatives

Pay and incentive benchmark, career path to Sales Executive (39.8% attrition today)

Track: Attrition vs Company (pts)

4 Act on engagement signals

Quarterly pulse survey, manager follow-up within 30 days

Track: % Low Job Satisfaction

Data fix: record course type, hours and completion, calibrate performance ratings, and add dates to measure whether the actions work.
